CURRENT FOCUS

Building production-grade software quickly: React/Next.js frontends, Flutter mobile apps, Python/Node backends, Firebase workflows, RAG systems, calling agents, and internal automations.

STARTUP WORK

Worked with Indian startups including UpHomes.in and Raddie.in, including customer-facing products, internal workflow automations, AI agents, and operational tooling.

Experience

PRODUCT + ENGINEERING

- Full-Stack Developer, Freelance & Startup Builder India
- Built and shipped full-stack web/mobile products across frontend, backend, database, authentication, integrations, and deployment.
 - Worked on startup products including UpHomes.in and Raddie.in, plus UpHomes workflow automations for lead handling, reporting, operations monitoring, and action queues.
 - Developed React/Next.js interfaces, Flutter app flows, Node.js/Python APIs, Firebase-backed features, dashboards, and automation tools.
 - Designed AI agent workflows including RAG systems, tool-calling agents, calling agents, and human-approved operating loops.

Skills

- Frontend
- React, Next.js, Flutter, HTML, CSS, responsive UI, dashboards, product flows
- Backend
- Node.js, Python, FastAPI, REST APIs, Firebase, authentication, data workflows
- Tools & Systems
- Git, GitHub, Linux, Windows, Android, automation, LangChain, LangGraph, RAG, AI agents, calling agents, deployment

Selected Projects

GITHUB-BACKED WORK

Vision Voice / Zeno AI

AI assistant direction for camera-first workflows, persistent memory, real-time guidance, and mobile ecosystem integration.

github.com/uphomesco-hub/vision-voice-agent

OpenWhispr

Privacy-first voice-to-text dictation app using local and cloud speech models with BYOK-friendly product direction.

github.com/uphomesco-hub/openwhispr

Agent Native App Framework

TypeScript SDK concept for semantic app action graphs so AI agents can operate apps through stable, safe interfaces.

github.com/uphomesco-hub/agent-native-app-framework

OpenClaw Work Agent

Ops brain for UpHomes internal workflow automations, company-signal monitoring, reports, memory, and human-approved action queues.

github.com/uphomesco-hub/openclaw-work-agent

ApplyPilot BYOK

Job-hunt automation product for resume-aware applications, user-owned AI keys, and structured application workflows.

github.com/uphomesco-hub/applypilot-byok

OpenClaw Obsidian Memory

Memory add-on for capturing, searching, and reusing Obsidian knowledge inside agent workflows and RAG-style recall.

github.com/uphomesco-hub/openclaw-obsidian-memory

Programming

JavaScript, TypeScript, Python, C, C++, HTML, CSS, SQL fundamentals

Education

- Swami Keshvanand Institute of Technology, Management & Gramothan
College, 85% aggregate
- Atomic Energy Central School No. 4, Rawatbhata
12th, 86.4%
- Atomic Energy Central School No. 2, Rawatbhata
10th, 9.8 CGPA

Certifications

Linux and Python Spoken Tutorial certifications by IIT Bombay.

Interests

Badminton, football, gaming, startup products, AI tools, and fast prototyping.
